

Slovenian Nouns 3

Construct a lexicon and grammar to account for the data below.

Ask yourself what is predictable and what is not. Posit morphological classes only if nouns' different behavior is not predictable. Pay special attention to the form you list under "Phonological Information" in the lexicon. Can you list a form from which all the other forms are predictable?

'o' represents [ɔ]. [x] is a voiceless velar fricative. [j] is a palatal glide.
